SUMMARY

Backend-focused developer experienced in building REST APIs and database-driven applications using Node.js, Express.js, MongoDB, and Python, with hands-on experience in authentication, authorization, MVC architecture, CRUD operations, and data validation.

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, C

Backend: Node.js, Express.js, REST APIs, JWT, Authentication, Authorization, MVC, CRUD

Databases: MongoDB, Mongoose, Firebase/Firestore

Frontend: React.js, Redux Toolkit, React Router, HTML5, CSS3, Bootstrap, Tailwind CSS

Python/GUI: Tkinter, PyMongo, bcrypt

Tools: Git, GitHub, VS Code, Postman, npm

Core Concepts: API Design, Middleware, Protected Routes, Data Validation, Database Design, Role-Based Access Control

PROJECTS

DVD Rental REST API — Node.js, Express.js, MongoDB, Mongoose, JWT

- Built a REST API for a rental system using Node.js, Express.js, MongoDB, and Mongoose with modular route and controller architecture.
- Implemented JWT authentication, protected routes, and role-based authorization across film, inventory, customer, staff, and rental resources.

Admin Panel & Product Management System — Node.js, Express.js, MongoDB, Mongoose, Passport.js, bcrypt, Multer

- Developed an MVC-based Node.js/Express.js application with MongoDB/Mongoose for product and category management, including CRUD operations and server-side validation.
- Implemented session-based authentication with Passport.js, bcrypt password hashing, protected routes, OTP-based password recovery, and image uploads using Multer.

Medicine Warehouse Inventory Management System — Python, Tkinter, MongoDB, PyMongo, bcrypt

- Developed a modular inventory management application using Python, Tkinter, MongoDB, and PyMongo with separate controllers, services, models, and middleware layers.
- Implemented medicine CRUD, inventory transfers, expiry and low-stock alerts, role-based access control, session authentication, validation, audit logging, and CSV reporting.

Zomato-Inspired Delivery Partner Dashboard — React.js, Redux Toolkit, Axios, Firebase

- Developed a delivery-partner dashboard using React.js, Redux Toolkit, React Router, and Axios with authentication and protected application routes.
- Implemented menu management, order tracking, and revenue analytics with centralized state management and API integration.

EDUCATION

B.E. in Electronics and Communication Engineering – 2024–2028

Dr. S. and S. S. Ghandhy Government Engineering College, Surat

CGPA: 7.67/10

CERTIFICATIONS

- **Full Stack Web Development** – Red and White Skill Education Pvt. Ltd. (2024–2026)
- **JavaScript** – HackerRank
- **Problem Solving** – HackerRank
